About Us:

Founded in 2001 as a part-time consulting business, The Mobile PC Guys has grown into the largest Managed Service Provider between Memphis and Nashville. With over 100 years combined IT experience our team consists of Engineers, Technicians, Network Specialists, Website Designers, Programmers and the best support personnel in the business. With our unique skill sets and team approach we can handle your IT problems, expansions, or maintenance.

We are a customer focused information technology company, The Mobile PC Guys, Inc is about building relationships with our clients through honest, clear communication and always seeing their needs first. We thrive on serving people and companies by showing them how to get more satisfaction, productivity and profitability out of todays technology.

What we Believe:

Our Faith:

We believe that it is by God's grace and provision that The Mobile PC Guys has endured. God has been faithful in the past, and we trust Him for our future. We are committed to:

Honoring the lord in all we do by operating the company in manner consistent with Biblical principles.

- Offering our customers exceptional service and value.

- Serving our team members and their families by establishing a work environment and policies that build character, strengthen individuals, and nurture families.

- Sharing the Lord's blessings with our team members, and investing in our community.

Our National Views:

We are proud to be an American company, we believe in the constitution as it is written. We believe our country was meant to be a constitutional republic in which individual rights and freedoms are protected by law against a majority.

Our Views on Equality:

We believe all people are created equal. period
No person should be treated differently or mistreated because of birth reasons. This includes race, origin, faith, etc….

Our Views on Our Planet:

We believe in creation and that God created this Earth and that is our responsibility to care for it; for future generations and our Father.

We were green before being green was cool; The McMahan family works in technology, however we are homesteaders. We power our home with solar, heat with wood, raise animals and grow most of our own food.

We do not ask or require our team members, clients, friends or anyone else to share our views; We respect each persons views and beliefs. However we do not hide our own views and we do not strive to be politically correct. We believe we can be honest in our relationships and have mutual respect for everyone and their views.

Our Clients

are our best advertising...

From my own home in Atlanta,Ga; I arranged for Mobile PC Guys to work on my parents' computer in Martin,Tn; and the experience couldn't have been any more pleasant. They were quick and courteous, and went far above and beyond in actually picking up the computer from the house, then re-installing it when it they were finished. Plus it didn't cost a fortune. I can't recommend these guys highly enough.!!
Chris Chandler – Atlanta, Ga

John and the crew at The Mobile PC Guys did a fantastic job on our recent total hardware/software change-over. As manager/ owner I was very apprehensive about delays in networking and billing transactions. John was more than sensitive to our concerns and went above and beyond to make the transition seamless. His team of professionals are an honest and hardworking bunch; Glad to have them on my side!
Michael Chad Odle FNP-C,MSN Owner- Union City Urgent Care

The service we have received from The Mobile PC Guys has been top shelf. They have been very courteous, professional, and timely on the jobs they have done for our electric utility. A total web page transformation, pc tune-ups, and a new network relocated from closet space to one of the nicest and most modern network facilities anywhere. We are very fortunate to have such qualified and motivated technicians here in our local area, who can be there when the phone rings. It was nice to have them organize and lead us through a process, that was such a major system improvement, and in the end have a product that was well worth the time and money spent.
Mark Fisk Engineering & Technical Services Hickman – Fulton Rural Counties RECC

Network Installation—Infrastructure Wiring—Low Voltage Cabling

We are the only IT firm in northwest Tennessee with a dedicated Cabling and Wiring crew ready to meet your needs. Our crew is licensed, insured and certified. We provide low voltage wiring services for home, business, enterprise, groups, churches, schools and anyone else needing quality work at an affordable price. We install wiring for new construction, network re-wire, network clean-up as well as additions and add-on networks.
Your business is expanding. You've rented more suites, purchased a new building, or perhaps construction is under way for great new offices. Whether you are upsizing, downsizing, or relocating, cabling and wiring, including network cabling, should be at the top of your concerns.

Are you ready to keep your business running smoothly, no matter the moves, additions, or changes to your phone system and computer network?

At The Mobile PC Guys our experience includes network cabling and wiring with CAT 3, CAT 5, and CAT 6 cabling, as well as pre-terminated fiber optics, video, and low voltage. We've helped businesses with moves, integrated new offices and new employees with existing phone networks, and made certain relocated offices keep their old extensions. All without a hitch.

- Malicious or Intentional Network Activity by Client or their staff.

BEST CHOICE

Proactive 24/7 Server & Desktop Management

The Mobile PC Guys will proactively manage, monitor, and update your desktops and servers from our centralized remote support center. Our 24/7 monitoring methods enable us to block threats, push critical software updates, and identify and fix potential issues—providing overall security and ensuring maximum "up-time" across your entire network.

Help Desk & Client Portal

Don't let their technical savvy and high IQs scare you. Our helpdesk technicians are personable, responsive, communicative…and some of them are downright charming! Just call us at 731-588-4200. Most of the time you'll hear a "real live" human on the other end ready and willing to assist with your computer, network or server issue. You can also create and track "trouble tickets" via our easy-to-use Client Portal. Shortly after submitting a request, you'll get a response (either a cheerful phone call or friendly email) notifying you of our plan to address the issue, and by when you can expect to hear from a technician. If you're on the road or away from your regular computer, just fire off an email to helpdesk@themobilepcguys.com. Include all the relevant details and contact info, and we'll get on it right away!

Onsite Support

For issues that cannot be diagnosed or resolved remotely, we'll schedule a site visit from one of our field technicians. You'll also receive regular visits from a field engineer to perform any routine services that require a physical presence.

24/7 Emergency Response

For after-hours simply call our main phone number 731-588-4200. We have on-call technicians 24 hours a day, 7 days a week (including weekends and holidays).

IT Strategy & Asset Management

As a true technology resource partner, your success is our success. Whether your business is moving fast, currently in cruise-control, or completely changing gears we'll help you make the most of whatever stage of development you're in. Leveraging technology to help you run faster, smarter and cheaper is what we love. We'll meet regularly throughout the course of our relationship, keeping you abreast of relevant industry trends and tools to help you achieve business goals.

Client Advocate

While a great deal of our services center around the proactive management and support of your networks and systems – maximizing "uptime" so you can concentrate on your core business – we believe the success of our partnership should also be measured by the strength of our relationship. This starts with healthy, proactive communication.

Managed DNS Filtering

Keep employees on task and take away their

ability to goof off on the internet.

$100.00 Per Month!
Improve Productivity and Security

Flexible web filtering security that stops online threats before they reach your users.

Managed Filtered DNS Cloud is a cloud based web filtering solution allowing us to monitor, control and protect your users and business when online. Requiring no on premise software or end user client software, set up is extraordinarily simple and quick. Filtered DNS Cloud allows us to create policies to protect your organization from malware, phishing, and viruses, block access to unsuitable material such as pornography, hate speech or mature sites, and control access to non work related material in a way that suits you. Comprehensive reporting will let you see the browsing activity of your organization.

Fast and Easy to Deploy: Cloud based, so no local software installation. Simple and quick set up, literally 5 minutes to get up and running. DNS based filtering so NO latency issues. 53 website categories to choose from. Includes web based application filtering. White and Blacklists. Cloud Keys to provide customized end user permissions. Real time organizational browsing view. Comprehensive on demand and scheduled reporting options.

- Includes web based application filtering so you regain control of your network bandwidth and prevent costly and potentially illegal abuse
- Easy to Set-Up
- Saves You Lost Time, which translates into Money.

Stop Paying Employees:

- To surf the internet.
- Do their online shopping.
- To hang out on social media sites.
- From streaming music, using your bandwidth.

Feature Summary:

- Cloud based, so no local software installation.
- Simple and quick set up.
- DNS based filtering so NO latency issues.
- 53 website categories to choose from.
- Includes web based application filtering.
- White and Blacklists.
- Cloud Keys (TM) to provide customizable end user permissions.
- Real time organizational browsing view.

The Average American Worker Spends 24% of their workday Cyberloafing!
Unsupervised Employees report up to 80% of their workday Cyberloafing!

URL Filtering:
Managed Filtered DNS offers URL filtering of up to 53 predefined and 8 customizable categories including ten's of millions of URLs which work in conjunction with a cloud based look up and real time classification system to provide unmatched combination of coverage, accuracy and flexibility.

Anti Phishing:
Managed Filtered DNS filters block phishing attempts protecting users personal information from theft.

Application Controls:
Managed Filtered DNS allows organizations to block access to unwanted applications, such as IM and Peer to Peer.

Whitelists and Blacklists:
Global whitelists and blacklists can be set up to ensure certain websites are always accessible or always blocked

Pricing:$1200.00 Per Year Per Location (Up to 50 Users/Work Stations)

That is $100.00 Per Month, compare to lost time, effort and efficiency of your labor costs.

Pricing:

1-10 Computers: $45.00 Per Computer Per Year
10+ Computers: $35.00 Per Computer Per Year

Family Plan Special
Protect Up to 4 Computers for
Only $125.00 Per Year

We won't slow you down.

4.4 MB — Webroot
51.4 MB — Norton
86.3 MB — Kaspersky
112.4 MB — Trend Micro
195.2 MB — McAfee

Webroot uses 11x less computer memory than the closest competitor during system idle. This chart compares the average amount of RAM in use by an Antivirus product during a perioid of system idle. This average is taken from a sample of ten memory snapshots taken at roughly 60 seconds apart after reboot. Products with lower idle RAM usage are considered better performing products in this category.

The best Anti Virus we have found!

Managed Cloud File Sharing

Managed Cloud File Sharing provides universal access to your files via the web, your computer or your mobile devices — wherever you are. It also provides a platform to easily view & sync your contacts, calendars and bookmarks across all your devices and enables basic editing right on the web.

Access Your Data

Store your files, folders, contacts, photo galleries, calendars and more on a server of your choosing. Access that folder from your mobile device, your desktop, or a web browser. Access your data wherever you are, when you need it.

Sync Your Data

Keep your files, contacts, photo galleries, calendars and more synchronized among your devices. One folder, two folders and more – get the most recent version of your files with the desktop and web client or mobile app of your choosing, at any time.

Share Your Data

Share your data with others, and give them access to your latest photo galleries, your calendar, your music, or anything else you want them to see. Share it publicly, or privately. It is your data, do what you want with it.

Advanced Control Panel

Easily create multiple users and group admins. You can define storage limits on individuals and define team admins. Documents and files can be created from within the web-interface or existing documents can be uploaded. Sharing and editing can be done securely in the browser and be shared inside the Cloud File Sharing platform or via a public link.

Managed Cloud Sharing Desktop Sync

Provide your customers with a fully customized and branded desktop sync application that is the best alternative to dropbox and google drive available.

Map and Mount Network Drives

All data is accessible via WebDAV / CalDAV/ CardDAV services. This allows the data to be synchronized with desktop clients and mobile devices. WebDAV allows you to map network drives to the branded cloud to manage your cloud data as if it was a network drive, shared folder, or mount point.

Easy and Affordable Pricing

$1.00 Per GB Storage. (Average Account 10GB)

* No license cost per user

** No long term contract, month to month.

Managed Offsite Backup Services

In today's world, most organizations are clear about the need to protect their most important asset, their data. An offsite backup is a secure, simple and affordable alternative to a traditional tape backup solution.

The Mobile PC Guys offers commercial managed offsite backup service using our cutting edge backup software, monitoring and management services all combined into one low monthly site license price + storage space.

Unlike Carbonite and others, you pay a low monthly site license fee that is based on your location and not each computer. So you are able to backup one or 300 computers for the same site license fee with our Advanced Backup. Our service is based on a site license fee + actual compressed storage space used. We have packages to fit any size organization.

All Backups are managed by The Mobile PC Guys

Compressed Data – Our cutting edge software compresses your data before sending it securely to our data center, so your storage is based on the compressed data space used not the actual size of your backed up data.

Example: We have a medical clinic that is backing up 175+ GB of data, after compression that equates to 17GB of data being stored on our system

Our service is managed. No one else in our industry takes this personal of an approach. There are many companies out there offering online backup services that require you to set up and monitor your own data backup routines. We take a different approach; we monitor it for you., We work to ensure you have a viable recovery or disaster plan should you need it.

The Mobile PC Guys Managed Back-Up is a fresh, secure, and affordable online backup service for small to medium-sized businesses, as well as individuals that absolutely cannot risk losing data on their computers. We manage your backups so you don't have to.

Data Center Infrastructure

Our data center is located in Tampa, Florida; a carrier-grade facility that keeps our equipment and data secure in case of any disaster. The Tampa data center sits on the 7th and 16th floors, with no-windows and hurricane proofed floors.

Datacenter Security:
Feel safe knowing that your data is being secured by a world-class data center. All doors on premises require pass cards with pin codes. There are also several state-of-the-art surveillance cameras and other monitoring equipment keeping watch 24/7/365, staffed by on-site technicians to achieve the highest uptime possible (99.98%).

Redundant Bandwidth:
Our bandwidth includes four different providers organized in a BGP blend. That means traffic from and to our servers goes over the fastest routes available on the Internet. Instead of one option, our traffic has four different paths to choose from. This also means that all traffic is redundant, if any combination of our four providers go offline or experience sub-par performance, our traffic automatically is routed via any of the other providers.

Redundant Power:
Our equipment is powered by diverse redundant connections to two of the major power grids. In the unlikely event that both power grids were to fail, the redundant architecture will switch to UPS systems and an on-site diesel power generator that can run the facility indefinitely without the need for the power grid. The diesel generators are located on the 7th floor and off of ground level to again protect against flooding.

Fire Suppression and Cooling:
The datacenter features a fully redundant environmental control system with state-of-the-art controls that maximize cooling, humidity control, and energy efficiency. The facility contains a fire suppression system that utilized the most advanced Ansul Inergen gas system available. By utilizing gas based fire suppression technology, as opposed to standard water based systems, ongoing operation is maintained for your equipment and personnel even in the event of an emergency.

What is your disaster plan?

Pricing:

Lite Backup: (1 Computer) – $10.00 Per Month + Storage Package

Advanced Backup: (Unlimited Computers) – $30.00 Per Month + Storage Package

Managed Firewall & Critical Internet Cellular Backup

SONICWALL®
APPROVED SOLUTION PROVIDER

peplink
CERTIFIED PARTNER

**Cellular Back Provided by:**

verizon wireless

Most businesses fall under one of many federal regulations to ensure customer or patient data is safe:

- Hipaa rules for Medical

- PCI or Red Flag rules for any business that stores customers information.

The bottom line is this: Computer security is a requirement for any sound business, not just for medical practices. Computer security is needed to protect the privacy of those whose information you store and manage. It is also needed to protect you and your business from the risk of penalty and legal liability if private information is used or released by your practice.

There are many firewalls that are deployed and never receive updates or have the threat reports they generate looked at until something happens. Every business should have a firewall in place, and every business should have their devices monitored and managed. If used correctly it will serve as a Unified Threat Management System stopping a great many threats at the "door" to your network.

Pricing:

Sonicwall Monitoring and Management—$50.00 Per Month

Pepwave or Peplink Monitoring and Management (No Cellular Backup)—$30.00 Per Month

Pepwave or Peplink Monitoring, Management and Cellular Back Up—$30.00 Per Month

We cover a large portion of west Tennessee and western Kentucky for OnSite Services:

Web Services—Managed Domain Names

Your domain name — it's how the online world finds you.

A domain name, or Web address, is an address where you can be found online. It's how you'll express yourself through email or your website and it's what customers think of when trying to find you.

Managed Domain Name Registration – with managed registration, we register, monitor and keep your domain safe.

Domains Starting at $35.00 Per Year

Web Services—Managed Web Hosting

Not all hosting is the same...

The Mobile PC Guys offers Business Class Hosting as a service to guarantee your business will be using the fastest, latest web technologies on robust, state-of-the-art servers.

All accounts are Monitored and Managed 24 X 7

- Secure SSL Login and Mgmt.
- 99.9% Uptime on all servers
- Co-Located Backup Systems
- Proactive Threat Management Systems
- Static IPs Available

Advanced Business Class Hosting – $35.00 Per Month

Unlimited Size, Unlimited Monthly Bandwidth Maximum Monitoring, Account Managed by MPCG Staff

Optional & Other Fees:

Content Management - $5.00 Per Month

eCommerce Platform with Advanced Features and Security- $24.00 Per Month

Monthly Search Engine Submission - $5.00 Per Month

Web Services—DIY Website Builder

Building Your Website Has Never Been Easier!

Our powerful website builder gives you an easy drag & drop interface and great social media widgets that make it fun to set up your initial site.

Advanced features like premium site designs, mobile publishing and advanced eCommerce keep you engaged and help drive your website with state of the art features.

We have the website builder over 6 million people around the world trust, combined with our managed and monitored state of the art business class hosting to give you the perfect Do It Your Self platform.

Are You Missing Customers?
Get Your Business Online Today!

Custom Designs: Customizable, polished, professional designs give you countless options for site layout and navigation. Personalize your space by changing the banner, background, text color and font. For more advanced users, DIY provides CSS editing.

Flexible Layouts: With a multitude of preset templates and flexible layouts, DIY lets you build virtually any page you want!

Password Protection: Keep unauthorized visitors from seeing your pages with password protection. Protect your whole website or specific pages.

SEO Optimized Pages: DIY pages are designed with search engine optimization (SEO) in mind. When you publish your website, Yola makes it easy for search engines to pick up your website so your customers can find you online.

Drag and Drop Widgets: Powerful widgets let you add contact forms, appointment scheduling, maps, blogs, videos, and photo galleries to meet your business needs.

Mobile Publishing: Mobile publishing lets you take your website and instantly create a version optimized for viewing on iPhone, Android, or BlackBerry devices. With a mobile website, your customers can connect with your business anytime, anywhere.

Web Publishing: Get found on the web. All DIY sites are HTML-based, not Flash, which allows search engines like Google to index your website. Sitemaps are also automatically generated every time you publish, making it easier for customers to find your site online.

Custom Domain Name: Domain names are how people visit your site. Search engines rank custom domains like www.YourSite.com higher than subdomains like YourSite.freewebsite.com. Plus, a custom domain will be easier for your customers to remember.

Ecommerce Available: That's right you can build an entire online store with our drag and drop technology. With full merchant services to accept credit cards, etc.

Business Class Hosting: Means your site can handle tons of traffic with no interruption in service. Additionally, traditional server backups are in place to ensure that dedicated resources are ready if needed.

In-House Support: We don't outsource – your questions will be answered by a friendly, qualified member of our team. Our support staff is well-acquainted with our software and can answer your questions accurately and competently.

Pricing:

Professional DIY Website Designer with Business Hosting - $39.00 Per Month

Full Ecommerce Suite for $24.00 more per month, that's $63.00 Per Month!

Includes Full SSL Security, Unlimited Products, Paypal and Merchant Account Integration, Inventory Management, Tax Calculation, Shipping Calculation

Web Services—Professional Website Development

We build sites from one page to hundreds of pages, unlike some designers we put as much effort in the smallest job as the largest one. Your business or group needs to be on the web in today's world or you will be left behind. Allow us to walk you through the process of making your business or group part of the information super highway. Demographics show us that more and more people under the age of 50 are not using print advertising, phone books, listing services and even electronic media is now hit and miss with so many radio stations, tv stations, streaming media sources, etc. When they are looking for a product or service they simply search for it, meaning they either find you or they don't.

We have been designing, building and marketing websites since 2001. With customers spread all over the United States we have a diverse portfolio of small businesses, service industry, religious organizations, churches, non-profits, government agencies, public utilities, medium to large businesses, corporate sites and many eCommerce sites including some of the largest and most well known seed & plant catalog online stores.

If customers can't find your website online, then you might as well not have one. There is more to having a website then just having a website. It needs to be visually appealing, function well and on a platform that is submitted to search engines in an aggressive manner so you can be found.

85% of consumers under the age of 55 use their smart phone, tablet or computer to find business listings. They do not use the phone book!

Your web presence isn't just essential in today's market, it is the best value for your advertising dollar. It works 24 x7 to showcase your business and contact information.

300+ Businesses, Churches, Organizations, Government Agencies and Public Utilities Trust Us To Build and Maintain Their Web Presence.

Every Business Needs a Website!

Digital Voice Services

US Digital Phone
Authorized Agent

We are proud to be an Authorized Agent of US Digital Phone, a leading provider of of Hosted VoIP and SIP Trunking services. US Digital Phone was born out of an overwhelming need for service oriented digital telecommunications providers. After working in the managed service provider arena for many years we found a void.

There were many VoIP providers selling services, however most of them didn't provide "Last Mile" connectivity. In other words they had great service but didn't help the end user work with his/her network to get the service to work on their premises.

So we found the best engineers, technicians, network managers and came up with a solution. US Digital Phone was created and partners with managed service providers, phone system installers and Information technology companies to provide complete support to our clients.

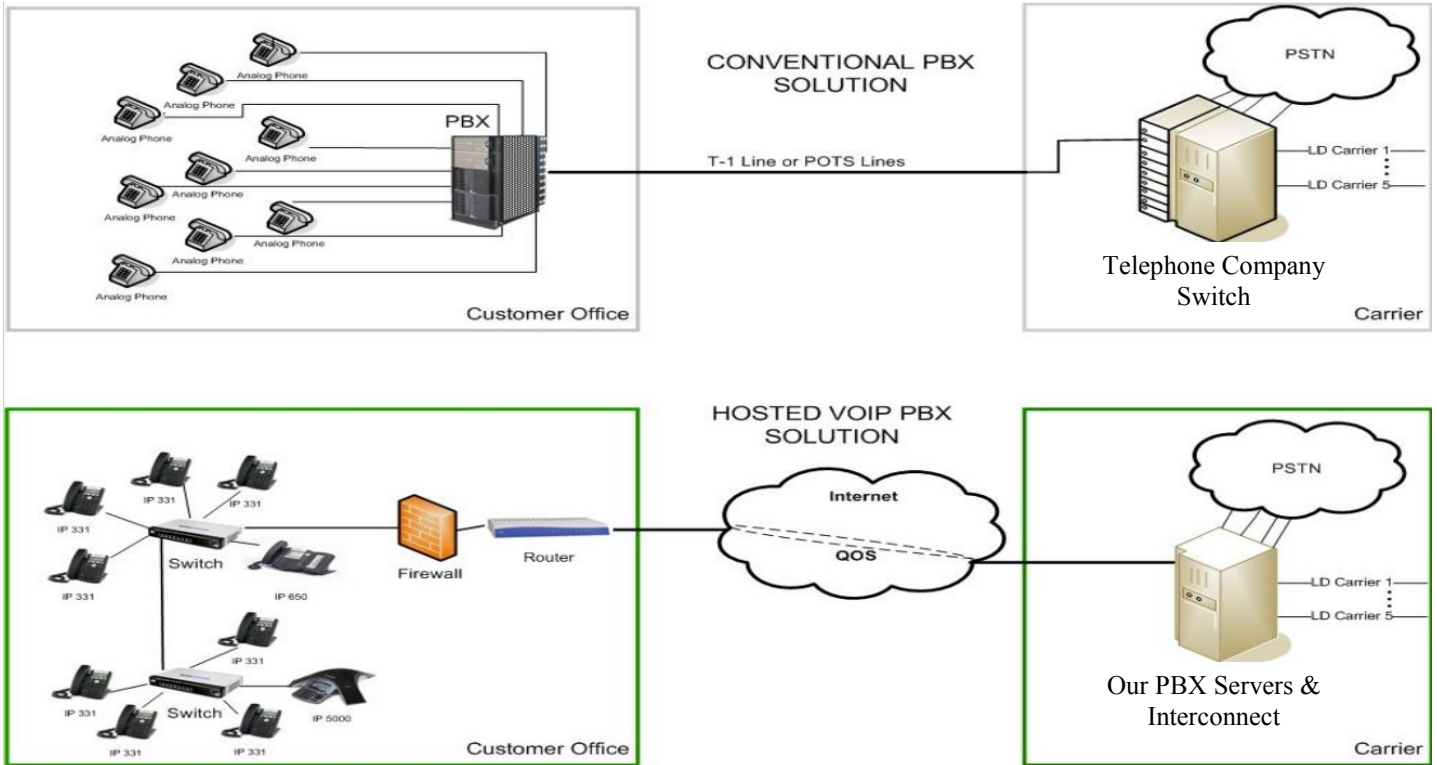

Time to Kick Your Old Phone Company Out Of Your Office?

Save up to 75% on your phone bill.
Get state of the art phone sets.
Better call quality with digital voice.
Cloud based management.
Amazing call features included.
Support you can reach, when you need us.

You no longer have to depend on the old telephone company.
We are the new and improved service of the future!

Digital Voice Services

Top Three Reasons to Switch to VoIP

1. Less Expensive Phone Service

By dropping traditional phone service and switching to VoIP, consumers typically save a significant amount of money on their monthly phone service. According to a recent survey by Consumer Reports, people who have purchased VoIP service are reportedly saving around 50% per month on their phone bill.

2. Calling Features

VoIP users enjoy a variety of free calling features, for which they were charged extra with traditional phone service. Those features include voicemail, caller ID, call conferencing, call waiting, call forwarding, and many others. VoIP users can have their voicemail messages e-mailed to them for easy playback and referencing. Furthermore, consumers can obtain extra numbers (also known as virtual numbers) so out-of-town friends and family members can dial a local number to reach the VoIP user easily and affordably.
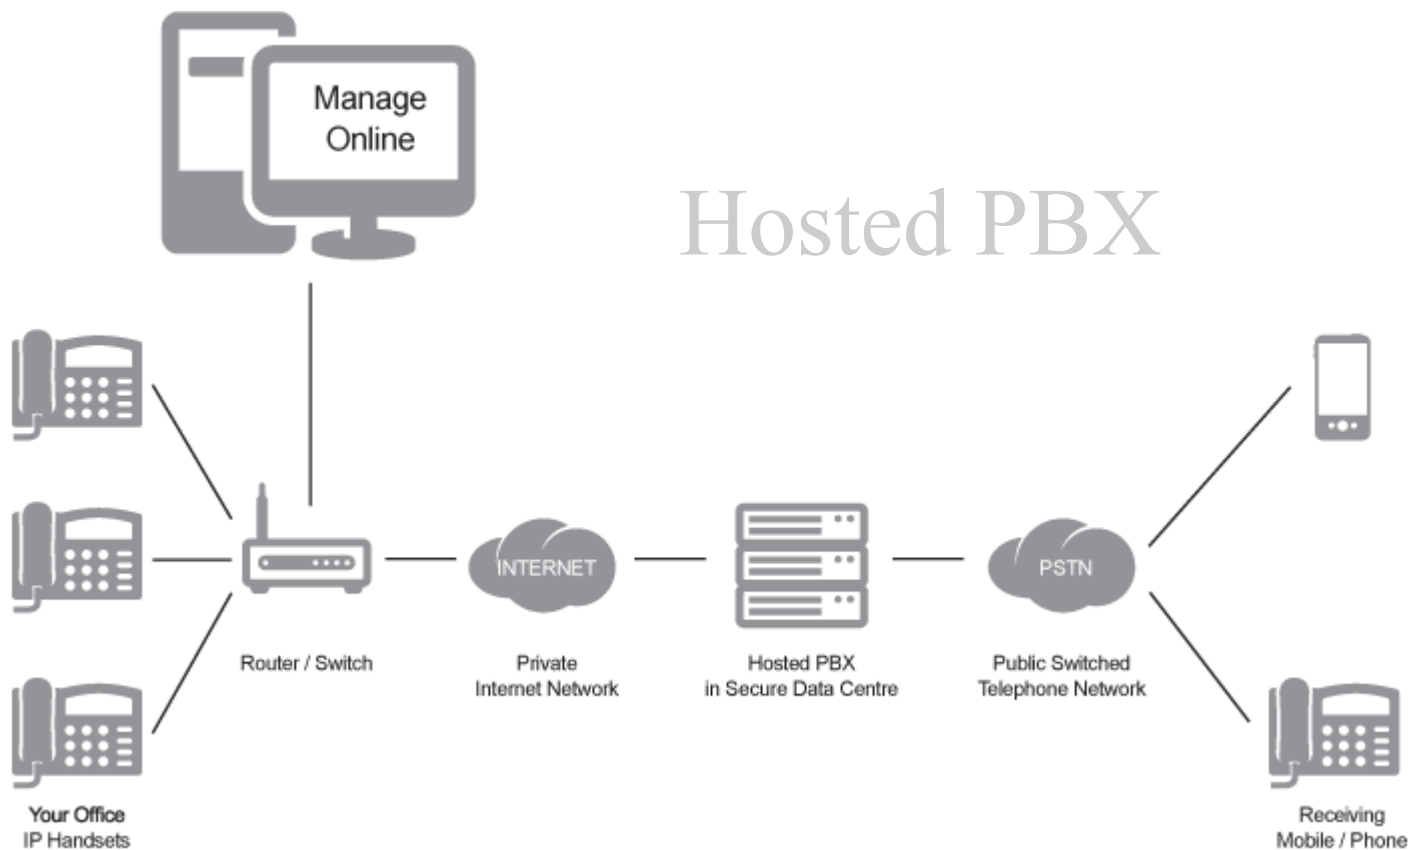

3. Convenience

What many VoIP users enjoy most about their phone service is the convenience. People place and receive phone calls in much the same way they did with traditional phone service. In most cases, they place calls exactly as they did with traditional phone service. Even better, consumers can track their call activity, manage voicemail, view billing information, and change account information online and at their convenience, 24 hours a day, 7 days a week.

There are now over 640 Million VoIP subscribers Worldwide!

Switch to All Digital Business Telephone Service by

US Digital Phone and Experience the Difference.

Digital Voice Services—Hosted PBX

US Digital Phone offers a hosted or cloud based PBX VoIP phone system that can replace expensive phone systems, installation, handsets, land lines and numbers with a simple, cost-efficient alternative. US Digital Phone provides a powerful phone system, hosted in the cloud, which is available to use on a monthly subscription basis. Each user can use a advanced digital phone set, which just needs to be plugged into their broadband or office network to allow them to access features such as voicemail, IVR and more, all from their phone or web based control panel.

VoIP is a means of carrying phone calls and services across digital Internet networks. In terms of basic usage and functionality, VoIP is similar to traditional telephone service, and a VoIP-enabled telephone works exactly like a 'normal' one. However, VoIP has a number of other advantages, such as cost, ease of use and advanced features not found on traditional on-premise phone systems.

When you adopt VoIP technology, you have typically been driven by the lower costs of IP telephony over traditional methods – a powerful incentive for most businesses. However, hosted VoIP from US Digital Phone not only brings you lower costs, but also gives you a complete array of other benefits. It is the perfect complement to our hosted desktop service, giving you comprehensive access to an affordable, mobile, scalable, state-of-the-art business infrastructure on demand.

Now you can cut your current phone bill in half and have the high-quality service and features previously only available to large Fortune 500 companies. Get the complete business phone system that delivers outrageously affordable, incredibly advanced business phone service right over your Internet connection.

US Digital Phone delivers IP-based Fortune-500 PBX features with Aastra or Yealink phones as your only hardware investment. Most VoIP companies are somewhat similar in their service offerings and price, However most REFUSE to manage "last mile" connectivity. Meaning they leave it to you to make it work on your network. We are different. We help you integrate our solution with your existing network and have special firewall/routing equipment available if needed.

We offer a competitively priced alternative to premise-based PBX solutions. There is never a long-term contract commitment. We earn your business every month! Our service allows you to fully outsource the cost and complexity of maintaining your own PBX—we maintain and upgrade the equipment, reducing your IT costs. We easily support single or multi-site implementations including home based remote workers. Our web based interface allows self-management of day-to-day features through an intuitive user interface. You can easily scale our service with pay-as-you-grow pricing—never pay for more than you need and most important, our service works with most every internet service provider worldwide.

Typical Example:
5 Extensions with 5 Phone Lines (Call Paths)
All Features of the Hosted PBX
Digital Fax to Email Service
$125.00 Per Month
plus taxes and required fees

Add $30.00 for Cellular Back-Up for your entire network.

All In Hosted PBX Pricing:

Includes 1 Local Phone Number

Includes 1 Unlimited Local and Long Distance Call Path Per Extension

1-2 Extensions $27.95 Per Extension

3+ Extensions $25.00 Each Extension

Additional and Optional Charges:

E911 Fee $1.95 Per Location

Additional Local Numbers $2.00 Per Month

Toll Free Numbers $2.00 Per Month + Usage ($0.03 Per Min)

Pricing does not include installation, set-up, wiring or phone equipment

A La Carte Hosted PBX Pricing

Includes 1 Local Phone Number

$10.00 Per Extension

$25.00 Per Unlimited Local and Long Distance Call Path

Additional and Optional Charges:

E911 Fee $1.95 Per Location

Additional Local Numbers $2.00 Per Month

Toll Free Numbers $2.00 Per Month + Usage ($0.03 Per Min)

Pricing does not include installation, set-up, wiring or phone equipment

Installation, Programming and Wiring Pricing

Program Hosted PBX—$150.00
Program SIP Adapter—$50.00
Phone Number Porting Fee—$25.00
Program and Install Managed Firewall—$125.00
Installation of Equipment and Wiring—$100.00 Per Hour

A Few of Our Features, All Included at No Additional Charge!

Announcements - Create multiple versions of announcements and easily control which ones are in use. An example would be to have a pre-recorded "Due to the weather we are currently closed, but staff is checking voicemail today", then dial in and tell the system to switch to that message when needed.

Auto-Attendants (also known as IVR) - Unlimited Auto attendants.

Calls can be given the option of dialing extensions.

Auto-Dialer / Call Campaigns

Do you have set groups of customers/members with whom you regularly communicate? Use the call campaign manager to place automated calls to lists of numbers.

Attended Transfer, Blind Transfer, Busy Lamp Field (BLF) / Presence Indicator

Phones with programmable buttons can show the status of extensions and queues.

Call Detail Records

Call Forward on Busy, all Forward on No Answer, Call Forward on Unavailable, Call Forward on Failure

If your Internet is down, or an IP phone is not connected for any reason, calls can be redirected to other extensions, to voicemail or out to mobile phones. Plus we now offer unbreakable VoIP with our Cellular Back-Up firewalls.

Call Hold, Call Pickup, Call Parking/Retrieval

When you park a call it is "on hold" on a shared parking slot that can be picked up by user. "Carl, you have a call parked on 710".

Call Queuing - Not just for call centers, call queueing allows the system to make intelligent decisions to get the call answered by a person as quickly as possible. Too many calls already waiting for sales? Send the new calls to the receptionist.

Call Recording- We can do all-call recording on specific numbers, all-call recording for outbound calls by extension, or on-demand recording (Press a button to start recording the call).

Call Routing- Each telephone number can route to different destinations.

Call Transfer, Call Waiting, Caller ID with name display, Caller ID Black Lists, Conference Rooms

Unlimited meet-me conference rooms. Assign different conference rooms to each department to avoid multiple calls being scheduled at the same time.

Dial By Name, Direct Inward Dial (DID) numbers, Calls can be routed by the number dialed.

DISA- Direct Inward Station Access – call in and dial a passcode and you can dial back out as though you were on an extension.

DND (Do Not Disturb), E911 integration, down to the extension level.

Estimated wait time announcements, FAX to Email/Web to FAX,

Find Me/Follow Me- Ring your phone, then continue to ring at your desk while simultaneously ringing your mobile. Optionally "confirm" the calls to your mobile. You answer and hear "You have a work call – press one to accept this call". The system can pass the original callerid through to your mobile – so you see it as a call from the actual caller, not a "call from work"

Hunt Lists, teractive Voice Response (IVR)

Local Telephone Numbers – Anywhere!!

Create an unlimited number of messages for use with hold music or as announcements.

Music On Hold – Streaming MOH, Intercom, Paging and Intercom

Voicemail - Voicemails can be delivered to your email or checked via your phone.

Frequently Asked Questions

I already have Hosted PBX, but would like to switch to US Digital Phone. Can I use the phones I already have?

Possibly, we support many brands of VoIP Telephones. When you contact us for a quote, just note the make and model of the phone sets you have.

Can I use my old On-Premise PBX phones with hosted PBX?

No, you would need to upgrade your phones to VoIP phones. We suggest Yealink equipment.

Do I need extra network cabling to use switch to Hosted PBX Service?

Possibly, You will need a data jack at each location you will have a VoIP Telephone. Some models of VoIP phones have a switched jack on the rear of the phone so you could plug the phone into a data jack; then plug your computer into the phone.

I have a firewall, will there be any problems getting reliable VoIP signals through my firewall?

Some firewalls don't play nice with VoIP traffic, however many have evolved to work well with VoIP. We can help you determine if you will need simple modifications made to the the programming of your firewall or if you need to replace it with a VoIP friendly Firewall Solution.

I have several staff members that work from home, will it be a problem for them to have a VoIP phone on our hosted PBX?

No problem, as long as they have high speed internet they are VoIP ready.

What do we do about faxing?

Excellent question, we have several solutions.

1. We offer free electronic faxing inside the VOIP control panel that will handle incoming and outgoing faxes without using a fax machine.
2. We also can connect an ATA (Analog Telephone Adapter) and plug your fax machine into the ATA.

I have an alarm that has to be plugged into a phone line, is this a problem?

No problem, again we would install an ATA (Analog Telephone Adapter) to plug your alarm into for service.

I only have one main number, but I have many roll over numbers now. When I switch to Hosted PBX do I need to port all of those roll over numbers?

No, Just the main number. With Digital Phone Service we are able to provide as many call paths/lines/trunks to you as you have paid for with only one local number. However you are welcome to purchase additional phone numbers if you wish; they are $2.00 per month.

If my internet goes down, do my phones stop working?

Yes unless you have our cellular back-up firewall, however if you don't you can call support and we can do an emergency forward to a cell phone or any other number you wish.

I have multiple locations, will this system really work like we are all in the same building?

Yes, with Hosted PBX Service the phone doesn't care where it is. It works the same if its in the same office or thousands of miles away.

Can I really get as many local numbers as I want in other cities like New York, Los Angeles, St Louis, Memphis?

Yes, regardless of where you are we can provide you with local numbers in over 10,000 rate centers across the USA at $2.00 per number per month.

Are there any extra charges for any of the features listed on the "Features" page?

Nope, you get them all!

Do you really have a cancel anytime policy?

Yes, we believe we should earn your business every month.

Digital Voice Services—SIP Trunking Dialtone

US Digital Phone offers business class SIP trunking service for IP-PBX systems and analog/digital telephone adapters. Our SIP trunks operate on your own broadband Internet connection and we offer unlimited rate plans.

US Digital Phone provides SIP trunking both to IP-PBX enabled phones systems as well as to just replace old analog phone lines for Legacy (Older) phone systems or phone lines. SIP trunking is a method of delivering telephone service over the Internet to customers that have SIP enabled private branch exchange (IP-PBX) solutions or just replace old phone lines being used by legacy phones systems or phone lines . SIP utilizes both Voice over Internet Protocol (VoIP) and Session Initiation Protocol (SIP) and it replaces traditional telephone lines or PRIs (Primary Rate Interface).
So what type of connections are available for SIP Trunking?

On Premise SIP Capable PBX or Phone System – If you have a fairly new telephone system or On Premise PBX/ Phone System. Then it most likely is SIP Capable. That means you can or we can connect directly to your phone system without needing an adapter, in order to replace the old telephone lines you are now using, or use them in combination with SIP Trunks. It allows for lower cost of operation for your phone needs.

Replacement of Telephone Lines – Maybe you have an older telephone system, an older On Premise PBX/Phone System or maybe you just have one, two or three line "off the self " standard telephones. We can replace the existing phone lines for any of these situations using what is known as an ATA Device (Analog Telephone Adapter). The ATA is a device that connects to the internet and then provides you telephone jacks in multiple configurations. We can provide one to forty-eight lines using a single device.

If you have a larger phone system with a PRI connection we can provide the same SIP trunking as above through a PRI gateway adapter and on into your phone system.

Bottom line – no matter what kind of phone service you have today – Centrex, Analog lines or PRIs, we can replace them with our low cost SIP trunking over your Internet service. The SIP trunking service will be the same cost no matter how we connect – the only difference is one time cost for analog or PRI adapters where required.

Legacy PBX

SIP Trunking Pricing:

Includes one local Phone number
Includes all standard calling features.
Unlimited Local and Domestic Long Distance

Price Per Call Path/Line/Trunk

1-19 Call Path/Line/Trunk $25.00 Each

20 + Call Path/Line/Trunk $20.00 Each

Additional and Optional Charges:

E911 Fee $1.95 Per Location

Additional Local Numbers $2.00 Per Month

Toll Free Numbers $2.00 Per Month + Usage ($0.03 Per Min)

Advanced SIP Trunking – adds ALL standard features plus Auto-Attendant, Queues, Call Recording, Time of Day Routing and many more features. Charge is per-account (not per call path/line/trunk) $20.00 per month

SIP Trunking Features:

SIP trunks can offer significant cost-savings for a business, eliminating the need for local telephone lines. Also with US Digital Phone's SIP Trunking Service all features are included.

Each SIP Trunk comes with one local phone number.
- Caller ID Control Inbound and Outbound
- Directory Listing or Remain Private.
- Enhanced 911
- Voicemail & Voicemail to Email
- Call Logs
- Call Waiting
- Call Forwarding
- Call Return
- Call Blocking or Black Listing
- Roll Over and Hunt Features

SIP trunking can be delivered to SIP enabled phone systems or through ATA(Analog Telephone Adapter) which allows us to install an ATA and then plug phone lines from the ATA to your devices.

YEA-CP860

P860 is the next generation IP conference phone launched by Yealink. An original diamond-section design makes the product look dazzling, while also providing enhanced display and pickup effect.

The CP860 combines fashionable design with HD voice quality, super-pickup efficiency, five-party conferences, joint-calls, meeting recording and playback and other multiple-advantages. The result is that it brings a high-quality, multi-functional user experience to small and medium-sized meeting rooms.

YEA-BT40

The Bluetooth USB dongle BT40 adds Bluetooth connectivity to your SIP-T46G with a wide variety of Bluetooth Headsets, allowing you to receive calls wherever you are in the office. Compatible with Bluetooth specification V4.0, back compatible with Bluetooth 1.1, 1.2, 2.0 and 3.0 for wide-rangging use.

$35.00

YEA-EHS36

The new and advanced Yealink Headset Adapter EHS36 provides the technical interface between your Yealink T28P or T26P telephone and a compatible wireless headset. It is approved for use with major manufactures Plantronics and Jabra wireless models.
The unit is easy to install, simply link EHS36 to the EXT port of the phone and, effectively `plug and play' giving you control of your Yealink phone and the ability to answer and hang up calls remotely.
It has been especially designed to ensure maximum productivity in business applications such as receptions, call centers and general telephone use and is ideal for the Corporate, Financial, Health, Government, Educational, Industrial, and SME/SoHo market sectors.

$45.00

YEA-YHS32

The Yealink YHS32 is over-the-head style headset made for office workers, SoHo and call-center staff. It is compliant with the full range of Yealink enterprise IP phones and features an attractive design with large ear-pads, a padded T-bar, pliable steel headband and 330 adjustable microphone boom. It is also ultra-light weight at only 50g.

$425.00

YEA-EXP39 or 39BLK

The Yealink EXP39 LCD Expansion Module has been designed to improve the power and flexibility of the advanced SIP-T26P and SIP-T28P Yealink IP phones. It features a 160x320 graphic LCD and 20 physical keys, each with a dual-color LED. These show very clearly which function had been selected and make operation very easy. What is more, you can add 20 additional keys via a page switch, bringing the number of programmable keys up to 40. Each programmable key supports functions that include speed dialing, plus BLF/BLA, intercom, call forward/transfer/hold/park/pickup/return. This allows up to six EXP39 units to be daisy-chained together.

The Mobile PC Guys

Your best solution to todays technology......

Thank You for Your Business and Friendship...

"If wealth was the secret to happiness, then the rich would be dancing on the streets, but only poor kids do that.
If power ensured security, then officials and politicians would walk unguarded, but those who live simply are the ones who have the soundest sleep.
If beauty and fame brought ideal relationships, then celebrities would have the best marriages.
Live simply, walk humbly, love genuinely and life will become easy & meaningful.
